Booking System

This is the navigation bar that has buttons to move between the different pages of the website. The navigation menu is consistent throughout every page maintaining internal consistency throughout the website, satisfying Nielsen's 4th heuristic.

Current user display

This is a button that acts as a link to the log in page, so that the website can add a booking to the signed in user

Please Log In to Continue

This is the not logged in message that is displayed to the user, to get them to log into their account

Log In Page

These are two buttons that allow the user to select whether they are adding events to the booking, or booking accommodation

The user has logged in and is able to either go to the event planner or the accommodation booking page.

This is a page that displays different options for accommodation that the user can choose for the weekend

Confirm Booking

The user has selected an event and is now redirected back to the event planner page and the event is now shown under the given day. This demonstrates Nielsen's 1st heuristic; as the user can now see the current plan for the event booking

This button is displayed when at least one event has been added, and allows the user to confirm the event and the accommodation booking
